SQL Server Practice Lab - Aggregates (100 Q&A;)

Sample Schema
We will use the following schema throughout the practice lab:

Departments(department_id, department_name)
Employees(employee_id, first_name, last_name, salary, hire_date, department_id, manager_id)
Customers(customer_id, customer_name, city)
Orders(order_id, customer_id, employee_id, order_date, amount)
Products(product_id, product_name, price, stock)

Q1. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q2. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q3. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q4. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q5. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q6. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q7. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q8. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q9. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q10. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q11. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q12. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q13. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q14. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q15. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q16. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q17. Count total number of employees.

Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q18. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q19. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q20. Count total number of employees.
Answer: `SELECT COUNT(*) AS total_employees FROM Employees;`

Q21. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q22. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q23. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q24. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q25. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q26. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q27. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q28. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q29. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q30. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q31. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q32. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q33. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q34. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q35. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q36. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q37. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q38. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q39. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q40. Find average salary of employees.
Answer: `SELECT AVG(salary) AS avg_salary FROM Employees;`

Q41. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q42. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q43. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q44. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q45. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q46. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q47. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q48. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q49. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q50. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q51. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q52. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q53. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q54. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q55. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q56. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q57. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q58. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q59. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q60. Find max order amount per customer.
Answer: `SELECT customer_id, MAX(amount) AS max_order FROM Orders GROUP BY customer_id;`

Q61. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q62. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q63. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q64. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q65. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q66. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q67. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q68. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q69. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q70. Find total sales per year.

Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q71. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q72. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q73. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q74. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q75. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q76. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q77. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q78. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q79. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q80. Find total sales per year.
Answer: `SELECT YEAR(order_date) AS order_year, SUM(amount) AS total_sales FROM Orders GROUP BY YEAR(order_date);`

Q81. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q82. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q83. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q84. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q85. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q86. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q87. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q88. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q89. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q90. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q91. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q92. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q93. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q94. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q95. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q96. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q97. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q98. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q99. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`

Q100. Find departments having more than 5 employees.
Answer: `SELECT department_id, COUNT(*) AS emp_count FROM Employees GROUP BY department_id HAVING COUNT(*) > 5;`
