

SQL Server Practice Lab - Filtering (100 Q&A;)

Sample Schema

We will use the following schema throughout the practice lab:

Departments(department_id, department_name)

Employees(employee_id, first_name, last_name, salary, hire_date, department_id, manager_id)

Customers(customer_id, customer_name, city)

Orders(order_id, customer_id, employee_id, order_date, amount)

Products(product_id, product_name, price, stock)

Q1. Get employees with salary greater than 50000.

Answer: `SELECT * FROM Employees WHERE salary > 50000;`

Q2. Get employees with salary greater than 50000.

Answer: `SELECT * FROM Employees WHERE salary > 50000;`

Q3. Get employees with salary greater than 50000.

Answer: `SELECT * FROM Employees WHERE salary > 50000;`

Q4. Get employees with salary greater than 50000.

Answer: `SELECT * FROM Employees WHERE salary > 50000;`

Q5. Get employees with salary greater than 50000.

Answer: `SELECT * FROM Employees WHERE salary > 50000;`

Q6. Get employees with salary greater than 50000.

Answer: `SELECT * FROM Employees WHERE salary > 50000;`

Q7. Get employees with salary greater than 50000.

Answer: `SELECT * FROM Employees WHERE salary > 50000;`

Q8. Get employees with salary greater than 50000.

Answer: `SELECT * FROM Employees WHERE salary > 50000;`

Q9. Get employees with salary greater than 50000.

Answer: `SELECT * FROM Employees WHERE salary > 50000;`

Q10. Get employees with salary greater than 50000.

Answer: `SELECT * FROM Employees WHERE salary > 50000;`

Q11. Get employees with salary greater than 50000.

Answer: `SELECT * FROM Employees WHERE salary > 50000;`

Q12. Get employees with salary greater than 50000.

Answer: `SELECT * FROM Employees WHERE salary > 50000;`

Q13. Get employees with salary greater than 50000.

Answer: `SELECT * FROM Employees WHERE salary > 50000;`

Q14. Get employees with salary greater than 50000.

Answer: `SELECT * FROM Employees WHERE salary > 50000;`

Q15. Get employees with salary greater than 50000.

Answer: `SELECT * FROM Employees WHERE salary > 50000;`

Q16. Get employees with salary greater than 50000.

Answer: `SELECT * FROM Employees WHERE salary > 50000;`

Q17. Get employees with salary greater than 50000.

Answer: SELECT * FROM Employees WHERE salary > 50000;

Q18. Get employees with salary greater than 50000.

Answer: SELECT * FROM Employees WHERE salary > 50000;

Q19. Get employees with salary greater than 50000.

Answer: SELECT * FROM Employees WHERE salary > 50000;

Q20. Get employees with salary greater than 50000.

Answer: SELECT * FROM Employees WHERE salary > 50000;

Q21. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q22. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q23. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q24. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q25. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q26. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q27. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q28. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q29. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q30. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q31. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q32. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q33. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q34. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q35. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q36. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q37. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q38. Find employees hired after 2020-01-01.

Answer: SELECT * FROM Employees WHERE hire_date > '2020-01-01';

Q39. Find employees hired after 2020-01-01.

Answer: `SELECT * FROM Employees WHERE hire_date > '2020-01-01';`

Q40. Find employees hired after 2020-01-01.

Answer: `SELECT * FROM Employees WHERE hire_date > '2020-01-01';`

Q41. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q42. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q43. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q44. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q45. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q46. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q47. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q48. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q49. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q50. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q51. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q52. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q53. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q54. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q55. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q56. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q57. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q58. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q59. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q60. List customers from city = 'New York'.

Answer: `SELECT * FROM Customers WHERE city = 'New York';`

Q61. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q62. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q63. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q64. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q65. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q66. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q67. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q68. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q69. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q70. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q71. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q72. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q73. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q74. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q75. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q76. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q77. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q78. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q79. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q80. Get products with price between 100 and 500.

Answer: `SELECT * FROM Products WHERE price BETWEEN 100 AND 500;`

Q81. Find orders where amount > 1000 and order_date in 2022.

Q82. Find orders where amount > 1000 and order_date in 2022.

Q83. Find orders where amount > 1000 and order_date in 2022.

Q84. Find orders where amount > 1000 and order_date in 2022.

Q85. Find orders where amount > 1000 and order_date in 2022.

Q86. Find orders where amount > 1000 and order_date in 2022.

Q87. Find orders where amount > 1000 and order_date in 2022.

Q88. Find orders where amount > 1000 and order_date in 2022.

Q89. Find orders where amount > 1000 and order_date in 2022.

Q90. Find orders where amount > 1000 and order_date in 2022.

Q91. Find orders where amount > 1000 and order_date in 2022.

Q92. Find orders where amount > 1000 and order_date in 2022.

Q93. Find orders where amount > 1000 and order_date in 2022.

Q94. Find orders where amount > 1000 and order_date in 2022.

Q95. Find orders where amount > 1000 and order date in 2022.

Q96. Find orders where amount > 1000 and order_date in 2022.

```
Answer: SELECT * FROM Orders WHERE amount > 1000 AND YEAR(order_date) = 2022;
```

Q97. Find orders where amount > 1000 and order_date in 2022.

Answer: `SELECT * FROM Orders WHERE amount > 1000 AND YEAR(order_date) = 2022;`

Q98. Find orders where amount > 1000 and order_date in 2022.

Answer: `SELECT * FROM Orders WHERE amount > 1000 AND YEAR(order_date) = 2022;`

Q99. Find orders where amount > 1000 and order_date in 2022.

Answer: `SELECT * FROM Orders WHERE amount > 1000 AND YEAR(order_date) = 2022;`

Q100. Find orders where amount > 1000 and order_date in 2022.

Answer: `SELECT * FROM Orders WHERE amount > 1000 AND YEAR(order_date) = 2022;`
